America's Lab Report National
Research Council 2006-01-20
Laboratory experiences as a
part of most U.S. high school
science curricula have been
taken for granted for decades,
but they have rarely been
carefully examined. What do
they contribute to science
learning? What can they
contribute to science learning?
What is the current status of
labs in our nation's high
schools as a context for
learning science? This book
looks at a range of questions
about how laboratory
experiences fit into U.S. high
schools: What is effective
laboratory teaching? What does
research tell us about learning
in high school science labs?

Downloaded from
acrc.uams.edu on October
2, 2022 by guest

How should student learning in laboratory experiences be assessed? Do all student have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U.S. education system and student outcomes, no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience, looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers, and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished.
