Financial Crimes: Psychological, Technological, and Ethical Issues

Michel Dion 2016-06-08 This book on the psychology of white collar criminals discusses various cases of financial crime, while also attempting to delve into the minds of the criminals in question. The literature on this topic is growing as it gains momentum in the scientific field, as a result of the extremely negative impact white collar crime has on its victims. Because there is considerable damage and vulnerability from these crimes, it is important to begin to classify them, and to understand the minds of those that commit these offenses. While the current literature is not extensive, this work provides a closer look into the various ethical and legal facets of financial crime, and helps to uncover the social, psychological and neurobiological factors that intersect in the minds of those criminals.

*A Textbook of Cost and Management Accounting, 10th Edition* M.N. Arora 2012 A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly,

simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters. Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self test by students. This is an ideal book for self study. New to this edition • All chapters thoroughly revised • Latest information on Cost Accounting Standards (CAS) issued by the Institute of Cost Accountants of India (ICAI) • Chapter on 'Miscellaneous Topics' made more contemporary by including some new sub-topics, and thus re-named 'Advanced Cost Management Techniques' • Revision and augmentation of practical problems

*The Skeptical Environmentalist* Bjørn Lomborg 2001-08-30 The Skeptical

Environmentalists widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The Skeptical Environmentalist offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

*Value Added Tax Fraud* Marius-Cristian Frunza 2018-12-07 Serving as an introduction to one of the "hottest" topics in financial crime, the Value Added Tax (VAT) fraud, this new and original book aims to analyze and decrypt the fraud and explore multi-disciplinary avenues, thereby exposing nuances and shades that remain concealed by traditional taxation oriented researches. Quantifying the impact of the fraud on the real economy underlines the structural damages propagated by this crime in the European Union. The 'fraudsters' benefit when policy changes are inflicted in an economic space without a fully fledged legal framework. Geopolitical events like the creation of the Eurasian Union and 'Brexit' are analyzed from the perspective of the VAT fraud, thereby underlining the foreseeable risks of such historical turnarounds. In addition, this book also provides a unique collection of case studies that depict the main characteristics of VAT fraud. Introduction to VAT Fraud will be of interest to students at an advanced level, academics and reflective practitioners. It addresses the topics with regards to banking and finance law, international law, criminal law, taxation, accounting, and financial crime. It will be of value to researchers, academics,

professionals, and students in the fields of law, financial crime, technology, accounting and taxation.

'NEW TRENDS IN COMMERCE' Dr. Pandit K. Gate 2022-03-21 Obligation bookkeeping requires a particular and exact, acknowledgment of the singular spaces of liability indicated by the company's association structure. Spaces of liability are the hierarchical units within a firm which are subject to the course of an individual (in some cases a board) who has allotted the obligation and assigned the position to achieve a goal (S). A definitive refinement in obligation regions is the singular laborer or in certain cases, a gathering of laborers inside a work place.

The Prologue Alexander V. Mirtchev 2021-03-09 This is not another alternative energy study. Rather, The Prologue identifies and charts the security-related trajectory of a relatively new global phenomenon: the ascent of alternative energy as a 21st century megatrend. Why and how have contemporary alternative energy developments evolved into a 21st century global socio-political and techno-economic megatrend? What are the security implications of this megatrend? And what does the megatrend's evolution reveal about upcoming geopolitical, energy, defense, environmental, and economic security challenges? This book endeavors to answer these questions by establishing the conceptual framework of a universally securitized world in which mutually interacting threats have expanded the needs and security considerations of today's globalized and interdependent actors, including states, international organizations, multinational corporations, and political and social movements. "Alexander Mirtchev's sweeping exploration of the changing energy landscape looks far into the future and outlines issues that will occupy scholars and policymakers for decades to come."—The Hon. Henry Kissinger, Chairman, Kissinger Associates,

Former Secretary of State and National Security Advisor "With the advancements in alternative energy technology at the beginning of the 21st century, energy security thinking and planning will never be the same—Alexander Mirtchev's profoundly original book reveals these new dilemmas that will challenge policymakers in all major economies and provides for dealing with the new realities in a smart way."—The Hon. Judge William H. Webster, Chairman, Homeland Security Advisory Council, Former Director of the CIA and FBI

EMERGING OF NEW COMMERCE Pradeep K.

Gupta 2022-03-21 INTRODUCTION

Monetary area assumes an essential part in the general improvement of a

country. The main constituent of this part is the cash related establishments, which go probably as a conductor for the trading of resources from net savers to net borrowers, that is, from the people who spend not actually their benefit to the people who spend more than their pay. The monetary establishments have customarily been the significant wellspring of long haul assets for the economy. These organizations give an assortment of monetary items and administrations to satisfy the fluctuated needs of the business area. Also, they give help to new ventures, little and medium firms just as to the enterprises set up in reverse regions. Hence, they have helped in diminishing territorial differences by prompting broad modern turn of events. The Government of India, to give sufficient stockpile of credit to different areas of the economy, has advanced a very much evolved design of monetary organizations in the country. These monetary establishments can be extensively arranged into All India foundations and State level organizations, contingent on the topographical inclusion of their tasks. At the public level, they give long and medium term credits at sensible paces of interest. They prefer the debenture issues of organizations, endorse public issue of offers, ensure advances and conceded installments, and so forth However, the State level establishments are for the most part worried about the advancement of medium and limited scope endeavors, yet they give similar kind of monetary help as the public level organizations.
